PROFESSIONAL SUMMARY

Fresh Computer Engineering graduate from the University of Baghdad with a strong self-taught background in modern web development (Frontend + Backend) alongside an academic foundation in Computer Systems and Engineering. Experienced in building large and complex web apps with AI-integration, image processing and more taken from design to deployment and passionate about projects that solve real world problems.

Knowledgeable in Google's developer console and SEO practices, with most of my apps having the #1 search results on Google's search.

WEB DEVELOPMENT SKILLS (Self-Taught)

Programming Languages: HTML, CSS, JavaScript, TypeScript, SQL
Frameworks / UI: React, Next.js, Tailwind CSS, Framer Motion
State & Data: Redux Toolkit, React Query, React Router
Backend / DB: Supabase (Database, Storage, Auth), REST APIs, OpenAI API
Tools: Git, GitHub, Figma, Vercel

ACADEMIC & GENERAL SKILLS (Learnt In University)

Programming Languages: Python, Java, PHP, Assembly, VHDL
Tools: MATLAB, Proteus, Microsoft Office (Word, Excel, PowerPoint)

EXPERIENCE & PROJECTS IN WEB DEVELOPMENT

1- Major Compass | February 2026 – (college graduation project)

App Link: <https://my-major-compass.vercel.app>

Code: <https://github.com/Eng-Muntadher/Major-Compass>

YouTube Walkthrough: <https://youtube.com/watch>

App Design: <https://www.figma.com/design/gm8by2LB14qytVDY1FQIbv/College-Major-App-Design>

- Built a full-stack bilingual (English/Arabic) college major guidance platform using Next.js, TypeScript, Tailwind CSS, and Supabase.
- Implemented Google and email authentication using Supabase Auth.
- Implemented authorization, customizable user profiles, and bookmarking capability for majors.
- Developed an AI-powered student assessment and ChatGPT chatbot that recommends suitable college majors.
- Designed an optimized major database containing 25+ majors across 8 categories with filtering, sorting, comparison tools, and pagination.
- Improved performance using Incremental Static Regeneration (ISR) and Server-Side Rendering (SSR).
- Ensured full responsive design and WCAG accessibility compliance.

2- MA Vault | November 2025 – (largest personal project with advanced performance features)

App Link: <https://ma-vault.vercel.app/home>

Code: <https://github.com/Eng-Muntadher/MAVault>

YouTube Walkthrough: <https://youtu.be/i7olw6nLtrA>

App Design: <https://www.figma.com/design/fN0jn4leJC3jrNPiTNmX0M/MA-Vault>

- Developed a full-stack image gallery platform using React, TypeScript, and Supabase authentication.
- Optimized image performance through compression and WebP conversion, largely reducing load times and image size by up to 80% depending on image format.
- Implemented HEIC image format upload support for iPhone users with client side image processing and compression.
- Added secure authentication & authorization using JWT's and Supabase auth.
- Implemented social features including likes, comments, bookmarks, user profiles, infinite scrolling, search, and filtering.
- Built a drag-and-drop upload experience for images and a keyboard-accessible command palette for power users.
- Designed a responsive UI with Framer Motion animations and Tailwind CSS.

3- Job Application Tracker | October 2025 – (my own version of a job tracker app inspired by the Huntr app)

App Link: <https://jobtracker-99.vercel.app>

Code: <https://github.com/Eng-Muntadher/jobtracker>

YouTube Walkthrough: <https://youtu.be/jt0IO6CTkw4>

App Design: <https://www.figma.com/design/mpsBxIJ4se2CLcwh9es5M3/Job-Application-Tracker>

- Built a full-stack job application management system using React and TypeScript with full CRUD operations.
- Implemented secure user authentication with an email confirmation flow.
- Designed and implemented dashboards with real-time Pie and Line charts using the Recharts library.
- Integrated an OpenAI-powered AI assistant chatbot for intelligent task support.
- Implemented advanced sorting, filtering, and search with Redux Toolkit for clean state management.
- Ensured WCAG accessibility compliance throughout the application.

4- Student Management System | May 2025 – (mid-graduation project)

Code: <https://github.com/Eng-Muntadher/Student-Management-System>

YouTube Walkthrough: <https://youtu.be/-giwMc3VMCw>

- Designed and built a student records management system with SQL-heavy queries for efficient CRUD operations.
- Built a Python backend for secure database interactions paired with a vanilla JavaScript, HTML, and CSS front end.
- Implemented filtering capabilities for quick data retrieval and access.
- Added dynamic theme support, background animations, and optimistic UI updates for an improved user experience.

EDUCATION

Bachelor of Computer Engineering — University of Baghdad | 2026

LANGUAGES

Arabic (Native) | English (Fluent) | German (Beginner)
